

PRESS RELEASE

MAYR-MELNHOF KARTON - SYMPOSIUM "OFFSET PRINTING ON THE REEL" ON MARCH 13 AND 14, 2008

Under the topic "offset printing on the reel" this year's MM Karton Symposium will take place in Eerbeek, Netherlands, on March 13 and 14, 2008. This time the event will focus on high productivity and outstanding quality that can be realised in the manufacturing of folding box board with most modern web offset printing presses. The ideal combination of cartonboard, machine and highly-qualified staff is finally key to constant top quality with varying materials from FBB (Folding Box Board) to WLC (White Lined Chipboard) applying all kind of finishing procedures.

For the first time the Symposium will be held in two languages: On March 13, 2008 in English and on March 14, 2008 in German. The event addresses technicians and people responsible for production. Practical demonstrations and technical lectures show that only the ideal co-operation between all suppliers can guarantee a qualitative and performance-oriented success.

From 10.00 – 16.30 Mayr-Melnhof Karton GmbH, Drent Goebel B.V. and Sun Chemical present all about their products for folding carton production. The lectures and the printing-demonstration in the morning are organised at the Drent Goebel site. For the after lunch session a visit of the production of MM Karton Eerbeek is scheduled. Guiding in small groups, qualified staff will answer all questions concerning the cartonboard production process.
